HEATON
INNOVATIVE PVT. LTD.

COMPANY PROFILE

INDUSTRIAL HEATING SOLUTIONS

Industrial Heaters • Ovens • Insulation Solutions

HEATON
INNOVATIVE PVT. LTD.

ABOUT US

Industrial Heating. Professional Expertise.

Established in 2018, Heaton Innovative Pvt. Ltd. manufactures industrial heaters and provides insulation solutions. Based in Pune, we serve pharmaceutical, automotive, engineering, automation and home-appliance industries. Our professional team combines manufacturing expertise with an innovative approach to address diverse industrial heating requirements.

OUR MISSION

To build a trustworthy industrial brand through timely delivery of products and services.

OUR VISION

To deliver reliable, high-performing solutions that achieve customer satisfaction.

WHY CHOOSE US

- Innovative design approach
- In-house manufacturing
- Designers and consultants under one roof
- Value-focused solutions
- Comprehensive heating solutions
- Experienced professional team

Band & Immersion Heaters

01 | MICA BAND HEATER

Mica-insulated band heaters for heating cylindrical components.

- Stainless steel, brass and GL sheaths
- Maximum watt density: 25 W/in²
- Operating temperature: up to 250°C
- Applications: cylinders, dies, drums, tanks, injection and blow-moulding machines, plastic extruders.

02 | IMMERSION HEATER

Heating solutions for water, oil and chemical immersion.

- Material options include stainless steel, Incoloy 800, Inconel 600, copper and titanium
- Manufactured in required sizes and shapes

03 | CERAMIC BAND HEATER

Ceramic-insulated heaters for barrel and nozzle heating.

- Uniform heat distribution
- Insulation helps reduce heat loss
- Custom sizes and designs
- Applications: injection-moulding and extrusion machines

Process Heating Elements

04 | CAST-IN HEATER

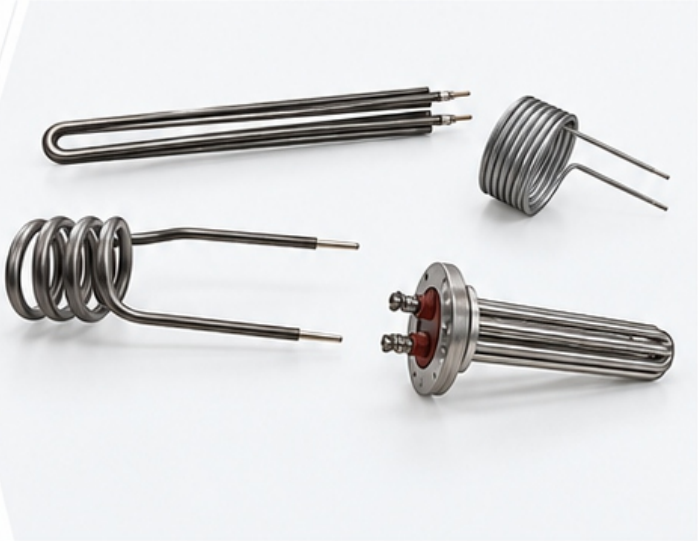

Aluminium and brass cast-in heaters in standard designs and styles.

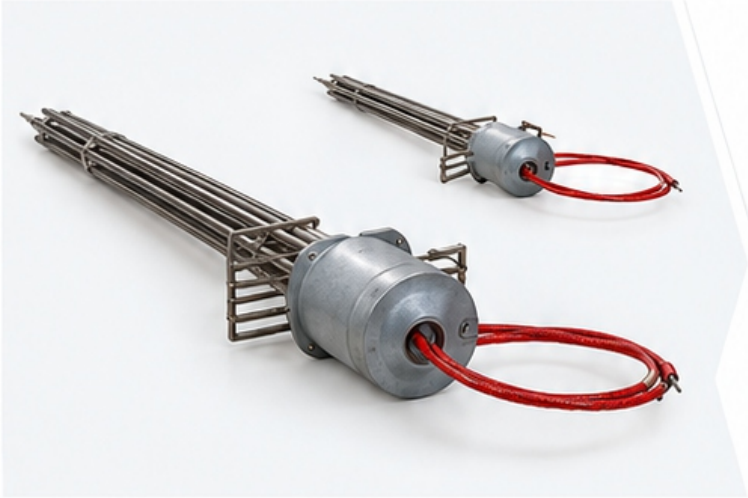

- Tubular heating element for close surface contact and quick heat transfer
- Mounting and thermocouple holes as required
- Custom configurations available

05 | AIR HEATER / TUBULAR HEATER

MgO-compacted heating elements in application-specific sizes and shapes.

- SS 304 / 310 / 316 / 321, Incoloy, Inconel, copper and titanium options
- Flanged and finned types
- Applications: ovens, dryers, kitchen and medical equipment, water and oil heating

06 | CORRUGATION MACHINE HEATER

Roller-heating elements for corrugation machinery.

- 10.5 mm diameter, swaged type
- SS 304 construction
- Assembly with nine straight air-heating elements
- Power options: 9 kW and 12 kW

Specialised Heating Solutions

07 | CARTRIDGE HEATER

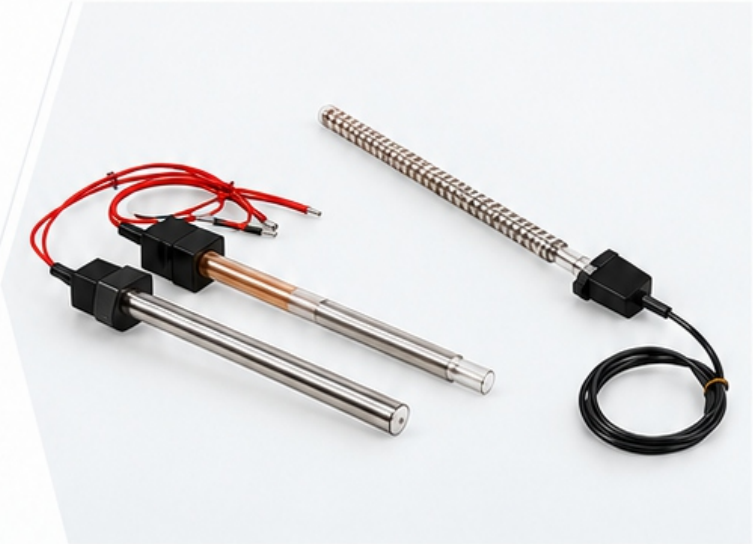

Cartridge heaters available in low- and high-density versions.

- Brass and stainless-steel sheath options
- Lead, screw or pin terminals
- 80:20 nickel-chrome or Kanthal resistance wire
- High-purity magnesium oxide filling

08 | SILICA GLASS IMMERSION HEATER

Fused silica tubing with a removable heating element.

- Designed for chemical-process heating
- Applications: acid baths, ferric chloride solutions, etching baths and anodising

09 | DRUM HEATER

Heating solutions for liquids and viscous materials stored in drums.

- Flexible silicone-rubber and metal-band options
- Helps maintain temperature and improve material flow
- Applications: oils, waxes, adhesives, resins, paints and chemicals

Industrial Air Heating

10 | INDUSTRIAL HEATER BANK

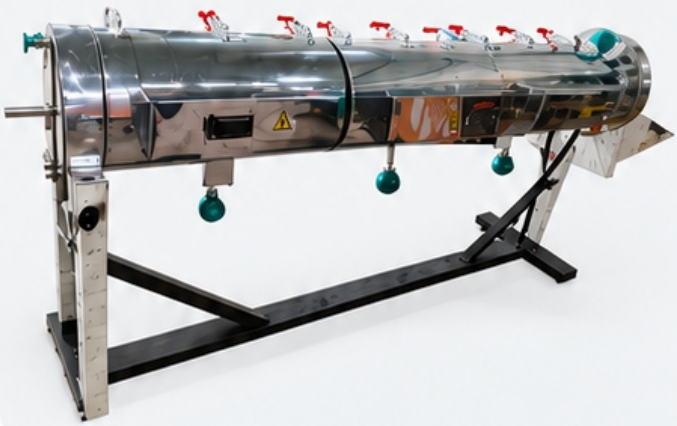

Heater-bank solutions for industrial process heating.

- Available within Heaton's industrial heating range
- Contact our team to discuss the required heating medium, capacity and installation

11 | HOT AIR GUN HEATER

Industrial hot-air gun heater from Heaton's product range.

- Discuss your application with our team
- Request product configuration, dimensions and electrical ratings

12 | HOT AIR BLOWER FOR HEAVY INDUSTRIES

Hot-air blower equipment for heavy-industry heating requirements.

- Share your process and installation requirements
- Contact Heaton for model details and technical specifications

Ovens & Integrated Systems

13 | TABLE OVEN FOR INDUSTRIAL USE

Table-oven equipment in Heaton's industrial product range.

- Discuss your heating application with our team
- Request chamber dimensions, electrical ratings and operating details

14 | HOT AIR BLOWER, INSULATION & CONTROL PANEL

Hot-air blower with insulation and a control-panel arrangement.

- An integrated option within Heaton's heating range
- Contact our team for configuration and technical details

15 | INDUSTRIAL CONVEYOR OVEN

Continuous heating and drying through a conveyor-fed heated chamber.

- Controlled heating for continuous production
- Applications include drying, curing, baking and preheating
- Customised to process requirements
